

## **SYSTEMS AND METHODS FOR ENHANCED DISPLAY AND NAVIGATION OF STREAMING VIDEO**

### **ABSTRACT OF THE DISCLOSURE**

Systems and methods for enhanced navigation of streaming video are disclosed. An exemplary method involves receiving a video as it is streamed from a server over a computer network. A first user request is received to display a first navigation video strip on the display device. The first navigation video strip includes a first plurality of video frames from the video. In response to the first user request, first instructions are obtained for displaying the first navigation video strip. The first navigation video strip is then displayed on the display device in accordance with the first instructions.
